Dangerous goods labels

SAFETY BEGINS WITH THE RIGHT LABELING

Our product range includes various types of dangerous goods labels, including hazard labels, placards, orange warning labels, labels with technical names and additional labels. Each of these subgroups meets all legal requirements and offers unique advantages for the labeling and identification of dangerous goods during transport.

DANGEROUS GOODS LABELS

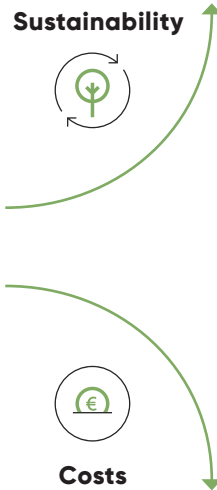

HOLISTIC PROCESS APPROACH WITH HIGH EFFICIENCY

Implementation of sustainable processes

How can order volumes be reduced?
How can disposal costs be minimized and recycling be improved? BOXLAB Services works with its customers to develop a new, customized process that always puts sustainability at the forefront.

Transfer to uniform standards

Different products are converted into a standard and supplemented with individual services. On-demand deliveries of the required quantities ensure a reduction in stock levels, purchasing volumes and manual effort throughout the entire process.

Why BOXLAB Services?

YOUR ADVANTAGES WITH BOXLAB SERVICES

Rely on label solutions that meet the highest legal requirements - with seawater-certified materials in accordance with the strict BS 5609 Section 3. Each layout is designed exactly according to legal requirements and is valid for every valid for every mode of transport, so you can rely on maximum safety and compliance you can rely on.

Our accessories, such as the DIN standard machine cleaning cloth and the versatile spray adhesive, ensure optimum application and support efficient processes.

For practical training, we offer perfectly coordinated materials ranging from flexible magnets and high-quality labels to a remote-controlled training truck with removable mini-labels - ideal for realistic training.

With 50% less ordering effort, 90% reduced storage space and orders from a quantity of 1, we enable sustainable and efficient processes - and EU-wide with 24-hour express delivery.

We rethink processes

QUALITATIVE, INNOVATIVE, CUSTOMIZED

BOXLAB Services specializes in developing innovative and and sustainable solutions for the areas of purchasing, storage, handling and disposal and implementing them individually in the process structure of our customers.
